PROFESSIONAL SUMMARY

Senior Systems and Security Engineer with 6+ years of experience delivering enterprise infrastructure across global organizations. Specializes in identity and access management, cloud platforms, endpoint management, and security operations. Led cross-functional initiatives supporting 1,000+ users, improving operational efficiency through automation, and strengthening security. M.S. in Cybersecurity from NYU Tandon.

PROFESSIONAL EXPERIENCE

TEADS | Senior IT Support Engineer | New York, NY

April 2022 – Present

- Led Okta consolidation across 15+ enterprise applications for 1,000+ global users; coordinated SAML/OAuth integrations and a zero-downtime cutover.
- Led Jamf and Intune zero-touch deployment for 1,000+ devices; created runbooks that reduced on-site support time by 60%.
- Automated Google Workspace and BambooHR user lifecycle workflows, reducing onboarding from 30 minutes to 5 minutes per employee.
- Manage service delivery for 11 North American offices and global teams; track 200+ monthly requests with a 4-hour average resolution time.
- Standardized global IT processes, reducing repeated issues by 40%; enforced MFA for 1,000+ users and supported SOC 2 and internal audits.
- Coordinated quarterly phishing exercises and targeted security training, reducing phishing susceptibility by 35%.

RESOURCES GLOBAL PROFESSIONALS | IT Analyst | New York, NY

June 2021 – April 2022

- Supported Cisco network, routing, switching, firewall, and site-to-site VPN infrastructure across North America, APAC, and Europe.
- Resolved WAN, LAN, ISP, wireless, and connectivity issues; managed Active Directory users, groups, computers, and replication.
- Investigated phishing threats with Mimecast and coordinated remediation with security teams.

MILES TECHNOLOGIES | Support Consultant | Lumberton, NJ

September 2020 – June 2021

- Planned and deployed client-site IT infrastructure while managing 5+ concurrent projects, including server rooms, cabling, DNS, and DHCP.
- Coordinated security monitoring with the SOC and deployed enterprise applications across client environments.

MAYOR'S OFFICE OF RECOVERY | IT Support Assistant | New York, NY

August 2018 – August 2020

- Deployed 120+ workstations and devices; supported 120+ users and maintained a 90%+ ticket resolution rate.

QUEENS LIBRARY CYBER CENTER | Technical Assistant | Queens, NY

August 2016 – August 2018

- Supported 72 daily users with Office 365 training and troubleshooting across Word, Excel, PowerPoint, and Access.

SELECTED INITIATIVES

- Infrastructure refresh: coordinated hardware procurement, inventory, and deployments across 11 North American offices and global locations.

- Security hardening: implemented organization-wide MFA, threat monitoring, and phishing-awareness campaigns for a global user base.
- Meeting room upgrade: coordinated replacement of Logitech equipment with Neatbar Pro across three conference rooms.

TECHNICAL SKILLS

Identity & access: Okta, Azure AD, Google Workspace, Microsoft 365, Active Directory, LDAP, SSO, SAML
Endpoints & cloud: Jamf, Intune, Addigy, Azure, Google Cloud Platform, VMware ESXi, Hyper-V
Security & networking: Cisco, TCP/IP, VPN, firewalls, Tenable, Nmap, Mimecast, KnowBe4, Splunk
IT operations & automation: Freshservice, Jira, LogicMonitor, Zendesk, PowerShell, Bash, Python

EDUCATION & CERTIFICATIONS

M.S., Cybersecurity — NYU Tandon School of Engineering

B.Tech., Computer Engineering Technology — New York City College of Technology, June 2019

A.A.S., Advanced Science in Computer Engineering Technology — Queensborough Community College, December 2016

Certifications: Jamf Certification · CompTIA A+ · Splunk · AWS Certified Cloud Practitioner · TestOut Routing & Switching Pro
